

Product Specification Sheet

Mossrock™ Forest Brown 20mm (FB20)

Product Description:

Mossrock FB20 is a recycled timber mulch made from both hard wood and soft wood timber, then screened to a uniform size. A dye is then added to the mulch to aesthetically enhance the final product.

Product Size:

Mossrock FB20 is a screened product, all particles have a diameter between 12mm and 20mm.

The length of particles vary from 20mm to 60mm

Materials Used:

Mossrock FB20 is made from both hardwood and softwood recycled timbers such as:

- Pallets
- Packing crates
- Old fences
- Construction and demolition timbers.

Mossrock **do not** accept timbers such as:

- CCA treated pine
- Laminated timber
- Craftwood
- Masonite
- Painted timber

Dye used for colouring is a food based dye that is non toxic to both plants and animals.

Material safety data sheets can be supplied upon request.

Manufacturing Process:

Mossrock FB20 is produced using Mossrock MR20 product. See MR20 product specification sheet for details.

MR20 is fed through a colouring machine which coats the material with a coloured dye mixed with water to produce the final FB20 product.
