

Product Specification Sheet

Mossrock™ River Gum Red Chip (RRC)

Product Description:

Mossrock RRC is a timber mulch made from A-Grade virgin pine wood in a chip form. A red dye is then added to the mulch to aesthetically enhance the final product. The final product is similar to red gum chips made from red gum hard wood trees.

Product Size:

Mossrock RRC is a predominately square chip product, particles have a width and length between 10mm and 50mm.

The thickness of particles vary from 5mm to 20mm

Materials Used:

Mossrock RRC is made from A-Grade virgin pine in a chip form.

Dye used for colouring is a food based dye that is non toxic to both plants and animals. Material safety data sheets can be supplied upon request.

Manufacturing Process:

Mossrock RRC is produced using A-Grand virgin pine in a chip form.

The Pine chip is fed through a colouring machine which coats the material with a coloured dye mixed with water to produce the final RRC product.

The final RRC product is then left to cure for 24 hours.
