

Ozbreed stock list

Ecodynamics acquire Ozbreed license

Ecodynamics Nursery have recently acquired an Ozbreed license, affording us the opportunity to grow a selection of Ozbreed lines to service the broader market.

With a focus on native shrubs, ground covers and strappy leaf plants, our Nursery has commenced building Ozbreed stock and will have plants on hand from late 2019 in tube and 140mm formats.

This list details our initial offering, with additional lines to be added over the coming months to expand the range of Ozbreed plants we have available.

Need an Ozbreed plant that isn't on this list? We can take orders for contract growing, or can help you secure stock by utilising our extensive industry network.

Like to know more? Get in touch with our Nursery Manager to discuss the requirements of your project.

Ozbreed stock list

Destiny [®] <i>Dianella tasmanica</i> 'TAS100' PBR
