

## Product Specification Sheet

# Mossrock™ Bush Mulch

---

### Product Description:

Mossrock™ Bush Mulch, commonly referred to as 'tree loppers mulch', is a mixture of various trees and bushes in a mulch form. It is a budget, non-screened mulch. It is commonly a dark brown/dark red-looking colour, but colours may vary on loads.

---

### Product Size:

Mossrock™ Bush Mulch is a non-screened product, particles have a diameter between 1mm and 100mm. The length of particles varies from 1mm to 100mm.

---

### Materials Used:

Mossrock™ Bush Mulch is made from various trees and bushes sourced from arborists and tree loppers.

---

### Manufacturing Process:

Mossrock™ Bush Mulch is processed by offsite contractors through various grinders and chippers. This product is then delivered to Ecodynamics Mulch in a mulch form to be on sold as a final product.
