

Product Specification Sheet

Mossrock™ Enviromulch (Freeway Mulch)

Product Description:

Mossrock™ Enviromulch (Freeway Mulch) is a non screened recycled timber mulch made from both hard wood and soft wood timber.

Product Size:

Mossrock™ Enviromulch is a non screened product, particles have a diameter between 1mm and 100mm.

The length of particles vary from 1mm to 150mm

Materials Used:

Mossrock™ Enviromulch is made from both hardwood and softwood recycled timbers such as:

- Pallets
- Packing crates
- Old fences
- Construction and demolition timbers.

Ecodynamics **do not** accept timbers such as:

- CCA treated pine
- Laminated timber
- Craftwood
- Masonite
- Painted timber

Manufacturing Process:

Recycled timber is accepted at our sites where it is manually checked for contaminants. The timber is fed into a grinder to produce a final product, this product then passes under a high powered magnet to remove a high percentage of ferrous material.
