

Product Specification Sheet

Mossrock™ Euca Mulch

Product Description:

Mossrock™ Euca Mulch is a mulch made from virgin eucalyptus wood in a chipped form, then screened to a uniform size.

Product Size:

Mossrock™ Euca Mulch is a screened product, all particles have a diameter between 2mm and 10mm. The length of particles vary from 5mm to 30mm.

Materials Used:

Mossrock™ Euca Mulch is made from virgin eucalyptus wood sourced from hard wood sawmills throughout Victoria, New South Wales and South Australia.

Manufacturing Process:

Virgin eucalyptus wood is harvested and fed into a wood chipper to produce a chipped wood product. This product is then fed into a screen which sorts the product by size into the final Euca Mulch product.
