

PRODUCT SPECIFICATION SHEET

E2 Mix

Our E2 Mix is perfectly designed for thriving plants used in shallow or deep podiums.

MATERIAL

In planters that are deeper than 400mm, our E2 Mix is the answer you're looking for. Specifically designed to have low levels of organic matter that not only minimise the possibility of soil slumping in podium/constructed planter garden beds, but virtually eliminates the risk of anaerobic conditions forming that can significantly impact healthy plant growth.

The ideal media capping (0-400mm depth) over the top of our E2 Mix is our Premium Planter Mix.

TESTING

- Developed in consultation with industry recognised Soil Scientists
- Routinely retested to ensure:
 - compliance with the testing criteria
 - customers receive a consistent high-quality product.

INSTALLATION

- Efficiently install E2 Mix in your landscape project using our pneumatic blower equipment fleet.

CREATING GREENER FUTURES

move large volumes
10-50m³
