

PRODUCT SPECIFICATION SHEET

Advanced Wood Fibre and Erosion Control Solutions

Protect, stabilise, and grow with our high-performance erosion control and soil improvement products.

OVERVIEW

ecoDynamics uses industry-leading wood fibre and soil matrix products designed for the toughest sites. From steep slopes to sensitive wetlands, these solutions control erosion, improve soil health, and support sustainable vegetation growth.

POPULAR BLENDS

FlexTerra® (HP-FGM)

- Delivers erosion control and dense vegetation cover.
- Ideal for slopes, shorelines, channels, pipelines, and environmentally sensitive areas.
- 18 months' longevity.

DuraVeg® Fibre Matrix

- 100% biodegradable with recycled, virgin wood fibres and tackifier.
- Free from plastics and netting.
- Forms an intimate bond with soil for better establishment.

ProGanics® (BSM)

- A topsoil alternative for challenging sites with depleted or low-nutrient soils.
- Accelerates soil development and biological activity.

ProGanics Dual®

- Combines ProGanics' soil-building with bonded fibre matrix erosion control.
- Reduces application time, tank loads, and project costs.

ProMatrix® (EFM)

- Reliable erosion control and vegetative establishment with up to 12 months of protection.

BENEFITS

- ✓ Superior erosion control
- ✓ Improves soil health and structure
- ✓ Sustainable, environmentally responsible solutions.
