

PRODUCT SPECIFICATION SHEET

Native Grass and Shrub Seed Solutions

Certified native blends designed to support biodiversity and deliver sustainable revegetation outcomes.

OVERVIEW

The Native Seed Certified blends we use are purpose-built for Australian landscapes. They support biodiversity, reduce maintenance costs, and deliver long-lasting revegetation outcomes tailored to local conditions.

POPULAR BLENDS

Dry Batters Mix

- Includes Rough Spear Grass, Saltbush varieties, Wallaby Grass varieties, Rytidosperma mix.
- Shallow-rooted, non-spreading varieties ideal for soil capping on batters and slopes.
- Best sown March–May; full establishment in 12–18 months.

Wet Swale Mix

- Includes Carex appressa, Ficinia nodosa, Juncus usitatus, Rytidosperma mix.
- Designed for water-affected zones, drainage swales, and wetlands.
- Best sown March–May; full establishment in 12–18 months.

Custom Native Mixes

- Available on request with four weeks' notice.

BENEFITS

- ✓ Certified native seed
- ✓ Supports local biodiversity
- ✓ Built for sustainability and resilience.
